“Agriculture program for disabled young people”

Naturex has a large extraction facility in Casablanca, close to abundant raw materials.

We have the conviction that having a job is essential for social integration, especially for people facing difficulties.

This is why the Naturex Foundation has already committed itself to support the project “Agriculture program for disabled young people”.

Driven by AgriSud association, in the Moroccan area of Ouarzazate and Zagora, the aim of this project is to promote social integration for young disabled people in the countryside by setting up farms fully integrated in the economic activity and social life.
