

# NATUREX

## Foundation

As part of the sourcing program for its Maca extract, Naturex goes in the area of Ninacaca on a regular basis, in the central Peruvian Highlands.

In this remote area, locals face a couple of difficulties especially regarding care access, education, and means of communication. The foundation projects fall into three categories:

1. Upgrading and improving the dental office.
2. Equipping and connecting an internet center for the town.
3. Rebuilding and re-furbishing the school.
