Naturex posted revenues of EUR 24.0 million for the first three months of 2008, representing growth of 22.1% at constant USD rates and 13.1% at current USD rates.

Following the integration of HP Botanicals, Chart Corporation and the innovative active ingredients division of Berkem over 3 months in 2007 and in 2008, organic growth stood at 7.3% at constant USD rates.

Naturex has confirmed its 2008 targets of double-digit organic growth in constant dollars and of improved profitability with an operating margin of 11%. The integration of its two latest acquisitions is going extremely well.

**Naturex will publish its revenue figures for the first half of 2008 in mid-July.**
